Experience

Front-End Developer — Treetop Consulting

January 2022 — Present

- Led the development of over 18 responsive websites for multiple clients, ensuring a high quality, functional, and user-friendly experience.
- Directly worked with UX/UI designers to deliver polished products, and developed custom components to suit complex designs.
- Collaborated with a team of developers in an Agile environment, using Jira to delegate, and organise tasks to produce functional applications.
- Researched and implemented cost-effective hosting and tooling solutions.
- Managed the deployment and integration of third-party services such as ReCAPTCHA and Hubspot.
- Continued to develop new features, perform updates, and provide support by troubleshooting issues and addressing client concerns.

Web Developer — Part-Time Contract

March 2021 — January 2022

- Adapted to the work environment quickly, to produce updates to existing websites, and create new web pages with complex functionality.
- As a beginner, I quickly became familiar with technologies such as Git, Wordpress, and PHP, to swiftly meet deliverables in a professional setting.
- Responsible for developing a number of simple, responsive, single page websites.

Professional Showcase | More at timothywu.dev

Rocket Financial — at Treetop Consulting

Developed a sleek, responsive product hub featuring dynamic user interactivity and visual elements.

Tokenovate — at Treetop Consulting

Built a clean, multi-page website focused on delivering information in an engaging and user-friendly manner with engaging and interactable graphics.
